Rules
You write every rule by hand.
...but there are too many exceptions
Machine learning
Learn the pattern from labelled examples.
...but someone still has to pick the features
Deep learning
Learn the features too, in many layers.
...and language turns out to be learnable at scale
LLMs
Read and write language.
...but they don't know your company's data
RAG
Look things up in your documents first.
...but reading isn't doing
Agents
Observe, decide, act, in a loop.
System One models (Jev)
decide, don't generate
the "decide" step
