noul
choice
score
a yes/no question
pick one label
a level on a scale
Noul(instructions=
"Is this a real attack?")
Choice(criteria={
"phishing": …,
"malware": …,
"benign": …})
Score(criteria=[
"Informational",
"Low", "Medium",
"High"])
noul = 0.68
choice = "benign"
probabilities = {…}
score = 1.05
probabilities = {0: …}
one probability: of “yes”
a probability per label;
they add up to 1
a probability per level,
plus the average level
