

how much thinking it needs

System 2 territory

- reconstruct an attack timeline
- tune a detection rule
- write the incident report
- explain an alert to the CISO

System 1 territory

- is this retrieved chunk relevant?
- is this alert real?
- severity 0-3
- dedupe: same incident?
- tool call: which tool next?
- which queue?

times a day at Kestrel (log scale, illustrative)
