No part of this book may be reproduced, stored or transmitted in any form without written permission from the author, except for brief quotations in reviews and articles. The code in this book is released under the MIT licence at github.com/Mukkandi-Sridhar/decide-dont-generate.

Independently published. First edition, 2026.

Jev is a product of TypeSafe AI. This book is independent: the author is not affiliated with TypeSafe AI, and the book is not endorsed or sponsored by it. All trademarks belong to their respective owners.

About the numbers in this book. The author did not have access to the Jev API while writing. Every Jev response, chart and table in this book was produced by `jev-mock-synthetic`, a deterministic stand-in that copies Jev's public interface but not its behaviour. Such material is labelled "Synthetic — not measured on real Jev". Claims made by the vendor are labelled "vendor-reported" and cited. The security data is synthetic too: Kestrel Logistics, Harbor Pharma and everyone in them are invented.

The information in this book is provided without warranty. The author assumes no responsibility for errors or omissions, or for damages resulting from its use. Nothing in this book is legal, security-compliance or medical advice.

Cover design and typesetting by the author. Text set in Source Serif 4, Inter and JetBrains Mono, all under the SIL Open Font License.
