

**LLM or
agent
proposes**

```
graph LR; A[LLM or agent proposes] --> B[the decision layer]; B --> C[ACT]; B --> D[REVIEW]; B --> E[ESCALATE];
```

The diagram illustrates a decision-making process. It begins with an orange box on the left labeled 'LLM or agent proposes'. An arrow points from this box to a large green box in the center titled 'the decision layer'. Inside the green box, there is a list of five criteria, each preceded by a checkmark. From the right side of the green box, three arrows point to three separate purple boxes: 'ACT' at the top, 'REVIEW' in the middle, and 'ESCALATE' at the bottom.

the decision layer

- ✓ schema + allow-list: is this a known tool?
- ✓ typed decision + calibrated P
- ✓ threshold from costs
- ✓ budget: steps, time, money
- ✓ trusted facts, not text claims

ACT

REVIEW
