

how much thinking it needs

System 2 territory

- reconstruct an attack timeline
- tune a detection rule
- write the incident report
- explain an alert to the CISO

System 1 territory

- is this retrieved chunk relevant? ●
- is this alert real? ●
- severity 0-3 ●
- dedupe: same incident? ●
- tool call: which tool next? ●
- which queue? ●

times a day at Kestrel (log scale, illustrative)
