

noul

a yes/no question

```
Noul(instructions=  
    "Is this a real attack?")
```

```
noul = 0.68
```

one probability: of "yes"

choice

pick one label

```
Choice(criteria={  
    "phishing": ...,  
    "malware": ...,  
    "benign": ...})
```

```
choice = "benign"  
probabilities = {...}
```

a probability per label;
they add up to 1

score

a level on a scale

```
Score(criteria=[  
    "Informational",  
    "Low", "Medium",  
    "High"])
```

```
score = 1.05  
probabilities = {0: ...}
```

a probability per level,
plus the average level
